

Geoffrey Andrews

BSc PhD MBA FIMMM

Geoffrey Andrews is the CEO and co-founder of **eccE**learning, the new online education provider which has just launched the world's first comprehensive, online spine surgery education programme. High quality, online education for Residents and Fellows has only now become feasible as a result of advances in digital and mobile technology. Teaching from our eminent international faculty of 140 at **eccE**learning is made efficient and effective by our unique pedagogy and digital capabilities; it enables trainees to receive an excellent and rigorous education from the convenience of their smart phone or laptop. And to do this whenever it suits them.

Prior to starting **eccE**learning, Geoffrey was CEO and then Non Executive Director at Ranier Technology which developed novel artificial disc prostheses under the Cadisc brand for the cervical and lumbar spine. Geoffrey founded Ranier and was responsible for the primary inventions for both its medical devices and novel materials technology, together with the company's growth and venture capital fund raising.

Geoffrey's early career was in the disposable medical device and pharmaceutical sectors, during which time he gained his MBA, and prior to that his academic career was in the field of chemistry and nuclear magnetic resonance spectroscopy.
