

Sanj Bassi

Mr Sanj Bassi is a Consultant Neurosurgeon who has an interest in both adult and paediatric neurosurgery, although the bulk of his practice is with children.

After gaining the Fellowship of the Royal College of Surgeons England, he trained in neurosurgery in Nottingham. This was followed by a Fellowship at the Necker Hospital in Paris and then at the Montefiore Hospital in New York, USA. On returning from New York he worked as a paediatric neurosurgical Fellow at the Radcliffe Infirmary in Oxford before taking up a position as a Consultant in Adult and Paediatric Neurosurgery at King's College Hospital. In addition to his expertise in degenerative spine disease, which includes the management of back and neck pain, arm pain and sciatica together with peripheral nerve disorders such as carpal tunnel syndrome; his main interests are in all aspects of paediatric neurosurgery. This includes the management of brain and spinal cord tumours in all age groups, metastatic brain tumours, hydrocephalus, spasticity, Spina Bifida and Chiari malformations.
