

# JAMES BOOTH

James is an experienced Osteopath who leads and develops a high quality patient-focused Osteopathic service at Nottingham University Hospitals NHS Trust treating patients who have been referred by consultant surgeons and physicians with complex and chronic spinal conditions. He provides highly specialist assessment and analysis of complex referrals, is responsible for teaching and training of surgical, medical and conservative care colleagues.

James is involved in research into effects of manual therapy in chronic back and neck pain sufferers using profile and PROM data capture and analysis, and regularly speaks on the subject. He qualified as an osteopath in 1999, completed an MSc in 2010 and completed Spinal Fellowship training at the Centre for Spinal studies and Surgery in Nottingham.
