

Neil Duggal

Dr. Duggal completed his neurosurgical residency in 1999 from Western University. During his residency, Dr. Duggal worked towards and received his MSc. After a subspecialty fellowship at the Barrow Neurological Institute with Dr. Sonntag, he joined the Division of Neurosurgery at Western University in 2000. He is currently Associate Professor in the Departments of Clinical Neurological Sciences (CNS); with cross appointments in the Departments of ENT, Medical Biophysics and the Brain and Mind Institute at Western University.

Dr. Duggal acts as Director of Research for the Department of CNS and Co-Director of the Western Interdisciplinary Pituitary Group. Dr. Duggal has translated clinical problems into successful research collaborations with scientists, receiving national and international grant support for work examining novel imaging paradigms in patients suffering from spinal disorders. Dr. Duggal's current research includes clinical, radiographic and biomechanical outcomes of spinal disorders including cervical myelopathy, minimally invasive surgery and disc replacement surgery.
