

Timothée de Saint-Denis

Timothée de Saint-Denis started medical School in Paris V before entering ENS (Ulm). During these years he followed both medical and biological study with a master in Developmental Biology at IBDM (Marseille). Once Graduated he spent 3 months in General Surgery unit in Kingston Public Hospital (Jamaica) before joining Lille (France) to end his specialty in in Surgery. After One Year in general and cardiac surgery he moved to Neurosurgery. Where he developed Special interests in Oncology and Spine Surgery especially. He underwent Eurospine and European Society of Paediatric Neurosurgery Course.

His permanent interest in Paediatric neurosurgery since his early years as a student , led him to Necker Hospital in 2015. Since his arrival he developed a special interest in medullar and spine child diseases. In collaboration with the Orthopaedic neighbours a translationnal unit for spine appeared to improve care, research and education in this field. He is for the moment locum in the department of pediatric neurosurgery (Pr Zerah) in charge of the handicap unit (Spine and spinal cord diseases, spasticity, movement disorders, antenatal medicine and surgery, gene therapy).
