

Jim Sevey

Jim Sevey is the Director of Scientific Field Development at Titan Spine. Mr. Sevey has specialized in medical devices and biologics for 25 years working on concepts, designs and new technologies within multiple specialties. He has brought to market multiple products through PMA and 510k routes in spine, orthopedic trauma, craniofacial, dental, interventional radiology, and cardiology. Prior to Titan Spine, Jim spent 13 years with Synthes in their biomaterials group as Manager for their Biomaterials Technical Specialist group. At Titan Spine, his focus is surgeon education, scientific field development and training, as well as clinical development focused on science and data. Jim graduated from St Mary's College in Moraga, California with a Bachelor of Science degree in Health Science and played rugby on the reigning US National Championship Team as a winger and was Captain and President for the team. Jim continues his passion for rugby and currently coaches the U10, U12 and U14 programs for Granite Bay Rugby in California.
